OILFIELD SOLUTIONS
Performance Products and Solutions

Responsive Expertise in High Performance Oilfield Chemicals

Riteks Oilfield Solutions offers high performance chemicals and toll blending capabilities for oil and gas service companies and industry suppliers.

We work with your technical operations and engineering teams to develop custom, specialized chemical blends to aid in oil and gas drilling, cementing, stimulation, fracturing, and production.

Our innovations extend into advanced additives for proppant coatings and composites for technical improvements in the Life of the Well.

Competitive, Value-Added Products, Direct From Us

In addition to developing one-of-a-kind oilfield chemical solutions, we also offer an extensive portfolio of chemicals and additives directly to industry suppliers and service companies at very advantageous prices.

Our volume purchasing power and decades-long relationships with key raw material suppliers ensures you both top-notch products & significant savings.

Just as important, our technical sales consultants work closely with your technical team to assure that your customers are getting the right product for their applications.

Fast Turnarounds, Prompt Deliveries, & Comprehensive Inventory Services

We've streamlined all of our processes, using vetted raw material sources, in-house test labs, state-of-the-art mixing and packaging equipment, optimized shipping, and complete inventory stocking services.

We are proud to provide fast production turnarounds, prompt deliveries, and exceptional technical service expertise.

In-House Lab Analyses

Our specialized, in-house lab allows us to quickly and efficiently test both incoming chemical components as well as your finished, blended products. So you can be certain we'll deliver products to your exacting specifications.

Upstream Operations We Service

- Drilling Fluids
- Cementing
- Stimulation
- Fracturing
- Production

Custom Manufacturing, Blending and Packaging

For more than 25 years, Riteks has been providing highly technical custom chemical blending solutions to a wide range of demanding industries.

- ISO9001:2015 state-of-the-art facility
- Qualify and warehouse your raw materials
